ABSTRACT

In present study researcher was eager to found the findings regarding the social desirability of the professors. Researcher randomly selected 15 Professors from different colleges of Surat city affiliated to Veer Narmad South Gujarat University, Surat. Researcher used social desirability scale for the study also first and last form of the scale has been accepted after the checking by specialist. Researcher used 10 statements regarding the social desirability scale. Percentage statistic used in this study to found the major findings regarding the objective. Major findings were: They are filling disgust with any person and also if anyone tells them to take their side then they will become excited.

Introduction

Human is a social animal. Also, Human is the part of society as well as the nation. If the relation between human and human is better than the relation between human and society is powerful. No, man can't live without society and society can't live without man, because man makes up the society, and society makes the man. So, human is attaching with the society and its rules. Society makes man perfect. Professors are may suffer from another society.

Professors are the persons who are to build the future of the young ones. So, their social value and desires may important for not only to colleges but also society and the nation. Therefore to know the social desirability of the professors is very important that's the reason why researcher did research on below topic:

Social desirability

Social desirability in an experiment occurs when a participant responds in accordance to social norms, or in a manner in which they believe the researcher would desire, rather than how they truly feel or believe. This is a confounding variable in many experiments and must be controlled for.

In present study social desirability means to know the social desirability of College professors of Veer Narmad South Gujarat University who worked in the Muslim minority schools in Surat city.

Delimitation of the study

1. The present study delimited for only 15 Professors of the Colleges affiliated to veer Narmad South Gujarat University in surat city.
2. Researcher only used self-made social desirability scale with ten statements.
3. Researcher only used percentage statistic for interpretation of the data.

Importance of the study

This study important for colleges, Government, Students who studying in the colleges.

Objective of the study

1. To construct the social desirability scale for the colleges.
2. To know the social desirability of the college's Professors in surat city.

Question to be answered

1. What is the social desirability of the college's Professors in surat city?

No.	Name of the colleges	Female Professors	Male Professors	Total
1.	V.T. Choksi B.Ed. College of Education, Surat	1	4	5
2.	K.P. Commerce college, Surat	4	1	5
3.	Bhagvan Mahaveer College, Surat	3	2	5
Total				15

Research Method

In present study survey method has been selected for this type of problem. The survey has undoubtedly been the most popular and the most widely used research method in education.

Procedure for data collection

In present study for data collection researcher personally visited three colleges and their professors. At that time researcher select five professors by random selection in every college and give them social desirability scale. In time limit researcher gave necessary instruction and taken scale after full filled by the teachers.

Statistics for data analysis

Researcher used percentage method for this type of data interpretation.

Results and discussion of the results

The tables for this study showed results are given below.

Table No. 2

Table shows no. of 'Yes' and 'No' and its percentages for every statement

No.	Statement	Yes	No
1.	If anyone is in trouble then I am go opposite from my principle but help him/her.	20 (80)	5 (20)
2.	I am not filling disgust with any person.	1 (4)	24 (96)
3.	I am not jealous by any one good fortune.	2 (8)	23 (92)
4.	I am not thinking that by from my bad work any person will be punished.	25 (100)	0 (0)
5.	If I am not finding a way then I am become angry.	4 (16)	21 (84)
6.	Sometime I know that the persons who have authority and true but I will desire to go wrong and do a rebellion.	15 (60)	10 (40)
7.	If any person who is disagrees with me then also I do discrimination with him/her.	17 (68)	8 (32)
8.	If I do not know something then I have no objection to accept that I have ignorance.	12 (48)	13 (52)
9.	If anything that I have to done and it is dislike by me then I tell everybody that I am ill.	1 (4)	24 (96)
10.	If anyone tells me to take their side then I will become excited.	16 (64)	9 (36)

No. Shown in brackets are percentages

Findings

1. Professors believe that if anyone is in troubles then he/she are going opposite from his/her principle but help him/her.
2. They are filling disgust with any person.
3. They are jealous by any one good fortune.
4. They are not thinking that by from his/her bad work any person will be punished.
5. If they are not finding a way then they are not become angry.

6. Sometime they know that the persons who have authority and true but they will desire to go wrong and do a rebellion.
7. If any person who is disagrees with his/her then also they do discrimination with him/her.
8. If they do not know something then they have objection to accept that they have ignorance.
9. If anything that they have not done and it is dislike by him/her then they tell everybody that they are ill.
10. If anyone tells them to take their side then they will become excited.

Conclusion

By this study and its findings we can say that the college's professors have good social desirability. In some case that are disgust with any person and also too jealous with some person these two statements goes wrong. It is not acceptable by society. This is the short efforts to find social desirability of the professors but we can take big sample and also more statement regarding this subject.
