### ABSTRACT

*The basic purpose of education was holistic development of a child as a person. But it was a fact that education by itself could not have achieved this goal. To study about primary education in Gujarat. To study about Middle school education in Gujarat. To study about Higher secondary education in Gujarat. Gujarat government website and information provided by these websites will also be used as tools for the study. The study being qualitative nature, the above means have been used. Interview methods have been utilized with Education Minister and Information Commissioner. In this research technique selection. It is possible to choose certain units from the given population or units which would truly represent the qualities of the selected sample. Low rate of drop out in Gujarat much increase. In Gujarat year 2001 in 10,402 school toilet facility was found grow up in 2013 are 86765 schools these called development of education. That study is related of education for all people is useful. The development of education as facilities are paid useful amenities that's like drinking water facility, toilet facility is paid the know of this topic are very useful.*

---

## **Introduction**

The development of education is the precondition for the development of society, Special facilities and privileges have been provided by the Government of Gujarat for the development of primary school education, middle school education, high school education, higher secondary education, University, technical education and education of special children.

In a socialist, democratic setup social justice was considered of importance. For the purpose of providing social justice in society was provided with facility for primary, middle school, high school and higher education, Everyone had the opportunity to be admitted to all education institutions. Everyone had equal opportunities for academic excellence.

The basic purpose of education was holistic development of a child as a person. But it was a fact that education by itself could not have achieved this goal. To attain this goal what else could be brought in focus ? Different aspects of education were duly considered like the subjects that were taught, syllabus, teaching methods, teaching policy, disciplinary methods, interrelationship between student and teacher, student behavior, student assessment.

### ➤ OBJECTIVEY OF RESEARCH
